RUSSELL LANDSCAPE GROUP, INC. MONTHLY MAINTENANCE SCHEDULE

General Maintenance for Warm Season Turf

January

- Turf pre-emergence herbicides, Winter/Fall Treatment (bermudagrass/Centipede)
- Final leaf removal
- Tree raising of lower limbs
- Fertilize, weed and deadhead flowers as needed (if installed by our company)
- Spray any fescuegrass in bermudagrass turf
- Pine straw mulch applications (if requested)
- Post-emergence weed control for turf and beds (as needed)
- Crape Myrtle pruning
- Liriope cut back
- Winter pruning of shrubs
- Begin turf scalping (bermudagrass ONLY)
- Inspection of trees and shrubs for pests, control by applications of fungicide and insecticide as necessary.

February

- Turf scalping (bermudagrass ONLY)
- Remove all fescuegrass in bermudagrass turf areas
- Tree raising and sucker removal
- Turf pre-emergence herbicides & fertilizations for Bermuda Grass (1st treatment, 25-2-5 with pre-m)
- Turf post-emergence herbicides
- Liriope cut back
- Fertilize, weed and deadhead flowers as needed (if installed by our company)
- Pine straw applications (if requested)
- Finish winter pruning of shrubs
- April 5th first application of fertilization to bermudagrass / zoysiagrass (high nitrogen; slow release) (32-5-7)

March

- Finish all Liriope and Pampas Grass cut back
- Finish turf scalping (bermudagrass ONLY)
- Fertilize, weed and deadhead flowers as needed (if installed by our company)
- Bed pre-emergence herbicides application
- First pre-emergence for bermudagrass/Centipede.
- Remove die back from lower limbs in small trees
- Spring tree and shrub fertilization
- Rose bush pruning
- Finish pruning of Crape Myrtles

April

- Turf post emergence herbicides
- Shrub pruning of new growth (as needed)
- Inspect trees, turf, shrubs for insects and disease and treat if needed
- Start spring flower installation
- Begin 2nd turf pre-emergence herbicide treatments in late April (21-3-8 with Barricade)
- Apply Mole Cricket Control (Extra Charge)

May

- May 10th finish 2nd turf pre-emergence herbicides and 2nd fertilization (25-2-5 with pre-M)
- Miticides/iron on junipers
- Fertilize, deadhead and weed flowers as needed (if installed by our company)

- Turf post-emergence weed control (as needed)
- Turf mowing and edging
- Turf and bed trimming
- Pruning of shrubs (as needed)
- Treat any turf or shrub insect or disease infestations (if necessary)

June

- Finish flower installation
- Miticides/iron on non-green junipers
- June 15th apply 3rd turf fertilization to bermudagrass (slow release, 28-5-12 with iron)
- Turf post-emergence weed control (as needed)
- Bed trimming
- Fertilize, weed and deadhead flowers as needed (if installed by our company)
- Pruning of shrubs (as needed)
- Prune azaleas after blooms senescence
- Fertilize azaleas
- Check for turf and shrub insect infestations or disease, and treat as necessary
- Remove tree suckers and any vines from shrubs

July

- Fertilize, weed and deadhead flowers as needed (if installed by our company)
- Turf post-emergence weed control as needed
- Bed trimming and weeding
- Treat disease incidence as necessary
- Shrub pruning (as needed)
- Finish pruning azaleas after blooms senescence
- Finish fertilizing azaleas
- Remove tree suckers and any vines from shrubs
- Fourth turf fertilization to bermudagrass on July 25th (28-5-12)

August

- Bed weeding and edging
- Turf and bed post-emergence pesticides (spot treatments)
- Remove tree suckers and any vines from shrubs
- Shrub pruning as necessary
- Soil samples taken where needed
- Fertilize, weed and deadhead flowers as needed (if installed by our company)
- Check trees for insects (as needed)
- Check turf and shrubs for disease and insects (treat if necessary)
- Remove any bermudagrass growing in Centipede turf areas and prepare for fall seeding

September

- Turf weed control post-emergence (as needed, spot treatments)
- Lime turf if requested (extra charge)
- Bed edging and trimming
- Tree and shrub fertilization (well balance fertilizer)
- Treat disease and insect incidence as needed in shrubs and turf
- Aerate, over-seed and fertilize fescuegrass areas as needed (wheat straw thin areas)
- Fertilize, weed and deadhead flowers as needed (if installed by our company)
- Begin fall fertilization with high Potassium fertilizer (bermudagrass/Centipede)

October

- *Begin Fall leaf removal*
- *Fall shrub pruning and shaping*
- *Turf mowing and edging (as needed)*
- *Begin Fall annual flower installation*
- *Treat disease and insect incidence as needed in turf and shrubs*
- *Finish Fall turf fertilization (high potassium)*
- *Complete Fall aeration, over-seeding and fertilization of fescuegrass turf*
- *Finish fertilizing all trees and shrubs (balanced fertilization)*

November

- *Spot mowing as needed*
- *Leaf removal (this will be the most time consuming item)*
- *Turf edging (as needed)*
- *Shrub pruning as needed and begin winter pruning*
- *Turn off irrigation system and winterize*
- *Fall post-emergence weed control as needed, turf and shrubs*
- *Fertilize, weed and deadhead flowers as needed (if installed by our company)*
- *Finish Fall annual flower installation*

December

- *Leaf removal (push to complete)*
- *Blowing of all paved areas and debris removal (total clean-up)*
- *Tree sucker removal*
- *Post-emergence weed control as needed, shrubs and turf*
- *Start tree raising of lower limbs*
- *Fertilize, weed and deadhead flowers as needed (if installed by our company)*
- *Start winter pine straw mulching after leaf removal*
